

Rear Umbilical Addon and Y Endstop Relocation

BOM	Pieces
M3 Heatinsert	4x
M3x10 SCHS	4x

"/images/rear_umbilical.png" is not created yet. [Click to create.](#)

since my a/b motor mounts are MJF single pieces i needed a way to add umbilical compatibility without the need to reprint anything. so i designed this.

its however heavily based on Selliot79's Design. i just designed it to be a bit smaller, to fit a IGUS CF5.05.18 perfectly and moved the mountings to the rear, so theres space for a [Y Endstop relocation](#)

check out [Dustinspeed's Stealthburner Umbilical Cover](#), a great addition to this mod :)
